

Is this always, sometimes or never true?

'The total length of all someone's fingers is the same as the length of one of their arms.'

You will need to complete this more than once therefore using more than one person (you can use yourself as a person to measure)

Total length of fingers and thumbs:

Thumb +
First finger +
Middle finger +
Ring finger +
Little finger + _____ = _____ cm

Length of arm (shoulder to wrist): _____ cm

Which is longer? _____
