

Thursday 26th March

Your activity today combines both Science and English. Choose an endangered animal and research its natural habitat. Here are a few ideas if you need them: tigers, sea turtles, orang-utans, gorillas, rhinos.

Over the next couple of days you are going to begin writing either a non-chronological report about an animal of your choice or a balanced argument as to whether these animals should be kept in the zoo.

Today, you need to:

- Research and make notes about your animals habitat
- Draw your animal in a food chain
- Research and draw/ write out the life cycle of your animal
